Introduction to Waste Management

Why Worry About Waste? It's a fact of life—everyone produces waste. But like many other everyday occurrences, the rate of waste production has increased dramatically in the past few decades. The average American generated 2.68 pounds of trash per day in 1960. The average Maryland citizen now creates an average of about **7 pounds of trash per day**. Combine this with our growing population, land development and a shift towards disposable products and there's simply just too much trash.

In the past it may have seemed simple to just throw things away, but it's getting harder to figure out where "away" is. In Frederick County the landfill is filling up, so the majority of our waste is trucked out of state to other landfills. This system is costly, inefficient and unsustainable.

What You Can Do. While waste management has become a more critical and complicated issue, it is not a problem that can be solved solely by government policy, industry action or even by technological advances. **There is a lot each individual citizen can do to use Frederick County's** resources wisely and reduce the amount of trash needing disposal.

This booklet provides basic information on resource management, waste reduction, recycling and disposal options available in Frederick County.

Additional information is available on the County's website:

www.FrederickCountyMD.gov/WasteManagement

You can't just throw things away; there is no "away".

This booklet serves as a guide to locally available programs and businesses involved in reducing, reusing and recycling waste. But this is only a starting point! Residents are encouraged to explore more, investigate their **households' use of resources, develop waste** reduction methods and look for opportunities to help tackle this challenge we all share.

Working together, we can manage waste wisely and create communities that are both more *economically* and *environmentally* sustainable.

Recycling Is Not the Answer! Well, recycling *alone* cannot solve the problem of too much trash. Recycling is good; it diverts resources that **would otherwise be wasted**. But even the “green” process of recycling has a carbon footprint, creates emissions and relies on valuable resources like fuel, money and time. So, recycling is one *part* of the solution; another key strategy is to **create less waste in the first place!**

Rather than managing the waste we have, waste reduction is a strategy **for preventing waste before it even occurs**. Think of it as “pre-cycling”—all the steps to take *before* there is something left to recycle. To get into the waste reduction mindset, just **remember the “4 R’s” of wise waste management:**

Rethink, Reduce, Reuse, Recycle.

Rethink. Remember, what is “convenient” now may become waste forever. Try to avoid things that you don’t need and products that are not sustainable, such as: single use/disposable items, Styrofoam®, plastic bags, goods with excessive packaging and toxic materials.

Reduce. Take advantage of services that reduce the amount of junk mail you receive (see the resource directory on the following pages). Buy items in bulk to decrease packaging. Look for energy-efficient and long lasting appliances and electronics. Inventory your kitchen goods, use what you have and avoid wasting foods.

Reuse. Recognize the value of durable, reusable goods instead of disposable items. Use tote bags for shopping. Get an electric razor. Use cloths instead of paper towels and disinfecting wipes. When possible, carry, use and refill a reusable bottle. Invest in rechargeable batteries. Look for recycled-content products, such as office paper and tissues. Shop for used-but-good products and donate your old items to resale organizations (see the resource directory for more information).

Then Recycle. Look at what’s left of your waste and recycle those materials that are accepted in Frederick County’s program.

Waste Reduction Resource Directory

Think Before You Throw! While throwing something away is very convenient, it is also *permanent*. While some things simply have no more use, unfortunately many things that are disposed of still have value.

The good news is that there are organizations and programs to help avoid waste, save space in our landfill, protect the environment, contribute to the economy and conserve resources. This is only a small sampling of such and is not an endorsement for any particular business or service.

Catalog Choice

This free service offers one-stop shopping to help you opt out of catalogs, coupons, credit card offers, junk mail and more. www.catalogchoice.org

Yellow Pages Opt Out

Simply enter your address at www.YellowPagesOptOut.com to stop receiving printed phone guides at your home!

BetterWorldBooks

Donate your books (they pay for shipping!) to Better World Books and they'll use the proceeds to fund literacy initiatives worldwide. www.betterworldbooks.com

Consignment Stores & Sales Events

A web search shows many consignment opportunities, from local stores to special events (such as [Tot Swap](#) or [Kids Closet](#)). Consignment is a great way to save money, earn money AND help keep materials out of the landfill!

craigslist

This website offers free classified ads for buying, trading, selling or giving away just about anything. www.craigslist.org

THE FREDERICK RESCUE MISSION

The Rescue Mission provides clothing, appliances and furniture to our community's working poor. Donated items are accepted at 419 West South Street in Frederick, or pickup from your home can be arranged by calling: 301-695-6633. www.therescuemission.org

freecycle

This nonprofit enables anyone to find new homes for old goods as well as acquire good, used items for free. Their mission is to build a worldwide gifting movement to reduce waste, save resources and ease the burden on landfills, while enabling members to benefit from the strength of a larger community. www.freecycle.org

Goodwill Industries

By donating to or buying things from Goodwill, you not only reuse items but also support job training and placement programs for people with disabilities and disadvantages. Stores take in and resell: clothing, bedding, appliances, toys, books, furniture and more. Goodwill also has established an E-Waste Initiative to seek economically and environmentally sound ways to recycle and reuse donated electronic equipment. Four locations: 400 E. Church Street, 5831 Buckeystown Pike, and 101 Willowdale Drive in Frederick as well as 202 E. Main Street, Thurmont. www.goodwill.com

Habitat for Humanity ReStore

These retail outlets provide quality, used and surplus building materials and home furnishings at a fraction of normal prices. Proceeds help local affiliates fund the construction of Habitat houses within our community. You can buy or donate useable construction materials, windows, doors, furnishings and appliances at their 622 N. Market Street store in Frederick. For more information call (301) 662-2988. www.habitat.org

swapstyle

This is an online fashion exchange where you can swap clothes, shoes, accessories, cosmetics and lots more, with people from all around the world. www.swapstyle.com

Have other ideas, local resources or websites for reducing waste? Let us know! Post your tips to our Facebook page (as well as questions and feedback) to share info with the community!

www.Facebook.com/FrederickRecycles

Checklist for Wasting Less

There are lots of ways you can help your household waste less!

- ☐ Place a container to collect recyclables next to every trash can in your home—if it's easier to recycle, people will.
- ☐ Use reusable cloths rather than single-use, disposable wipes or paper towels. Keep a jar of cloth wipes soaking in a cleaning solution, ready-to-go on your kitchen or bathroom counter.
- ☐ Use compost to reduce waste and boost the health of your garden. Aside from diverting up to 30% of your trash (food and yard waste), compost creates healthier soil, making stronger, healthier plants—and that means less fertilizer and chemicals to buy or dispose.
- ☐ Buy—and carry with you—a reusable mug or bottle.
- ☐ Put a reminder sticker on your steering wheel so you never forget to bring your reusable bags to the store again!
- ☐ Take along a reusable container for leftovers when you eat out.
- ☐ Regularly inventory what is in your refrigerator and cupboards to avoid buying excess. Look at expiration dates to avoid wasting foods.
- ☐ Buy and use rechargeable batteries and a charger.

Maybe you're already doing many of these things and would like to green your life to another level. Or maybe you'd like a little assistance in just getting started.

Either way, the Frederick County Office of Sustainability and Environmental Resources can help! Their **"Green Homes Challenge"** program helps residents take action to reduce energy use and utility bills, adopt green lifestyle practices and use renewable energy. The initiative is comprised of three corresponding certification processes: Power Saver, Green Leader and Renewable Star.

Participants can get recognition and even win prizes in this great community program. For more information call 301-600-6864 or visit: www.SustainableFrederickCounty.org/GreenHomes

Facts About Waste & Recycling

- ➔ Curbside recycling began in Frederick County in 1991, with a pilot program for 4,000 households.
- ➔ By 2009, every single-family home in the county could participate in **curbside recycling**; that's now more than 75,000 households! Frederick County has the largest geographic collection area of any curbside recycling program in the state of Maryland.
- ➔ Recycling 1 ton of paper saves: enough energy to power the average American home for six months, 7,000 gallons of water, 3.3 cubic yards of landfill space and reduces greenhouse gas emissions by one metric ton of carbon equivalent. (EPA, 2013)
- ➔ In Frederick County in 2011:
 - 915,514,000 pounds (457,757 tons) of waste were generated.
 - 231,859,080 pounds (115,929.54 tons) of material were recycled, including 2,967 tons of plastic, 4,645 tons of metals, 2,996 tons of glass and 43,434 tons of paper and cardboard.
- ➔ The County Commissioners have established a waste diversion goal (material removed from the waste stream through recycling, composting and other strategies) of 60% by the year 2025.
- ➔ Businesses pay significantly less to drop off recyclable materials at **the county's waste transfer station versus regular trash**.
- ➔ As part of a 2012 Maryland law, multi-family properties with more than 10 units are required to make recycling service available for their residents by October 2014.
- ➔ Recycling one aluminum can saves enough energy to run a 100-watt bulb for 20 hours, a computer for 3 hours, or a TV for 3 hours. (EPA, 2008) For every six-pack of soda or beer not recycled, the energy equivalent of one beverage can full of gasoline is squandered. (Container Recycling Institute, 2001)
- ➔ Americans comprise only 5% of the global population, but create **30% of the world's garbage**. (Source: America Recycles Day Foundation)

Waste and Recycling Info On-the-Go!

Recycling, trash, composting...what goes where?!

Now there's an app for that! In order to waste less, it helps to know what to do with the waste you have—recycle, compost or throw it away. Now you can use our free My-Waste mobile app to search a database of thousands of items to learn how to dispose or recycle them correctly.

The app is like a mobile version of this book, with tons of info conveniently and instantly accessible, wherever you go!

What is “My-Waste”? It's a software application for mobile devices (a.k.a. a mobile app); it can be used on smart phones or tablet computers, **currently compatible with either iOS or Android devices.** And, it's completely free! Visit our site to download:

▶ www.my-waste.mobi/FrederickMD

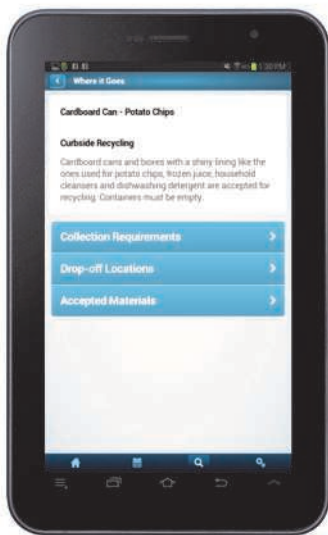

What does “My-Waste” do?

My-Waste offers several key features:

- **Recycling Reminders** Ever forget to set your cart at the curb? Now you can customize personal reminders for your recycling day!
- **Report a Problem** Have a curbside recycling issue to report? Use the app to take a photo and instantly let us know!
- **Schedule Change Announcements** Quickly find out if severe weather or other unforeseen circumstances are affecting your curbside recycling schedule.
- **Event Notifications** Get advanced notice and set reminders for special events, like our twice yearly Household Hazardous Waste Drop Off days, or find out when and where you can drop off your Christmas tree for recycling.
- **Facility Information and Useful Resources** Contact information, directions and useful tips for utilizing our programs and facilities. Plus, info on other resources, such as Goodwill and more.
- **Searchable Database** The app includes a searchable database so you'll never have to wonder what bin to place something in.

Customizable Reminders for Events and Biweekly Recycling Service:

Enter a search term and find out which bin to place your waste in- trash or recycling!

Plus, get instant access to a wealth of resources and information.

Download for free:

www.my-waste.mobi/FrederickMD

Frederick County's Recycling Program: The Basics

Recycling in Frederick County is Easy! Every single-family household (including townhomes) can recycle using our single-stream curbside collection program. And, we have a website just for you, with answers to the most frequently asked questions:

www.LearnMoreRecycleBetter.org

What is "single stream"? It simply means that all county-accepted recyclable items can be mixed together in a single container—no sorting, compacting or bundling required! [General guidelines for the single stream program](#) include:

- Place items *loose* inside a curbside collection container—not inside bags! (The *only* exceptions to this rule are recyclable plastic bags which should be gathered together inside a single recyclable plastic bag, and shredded paper, which should be placed in a paper bag or in a paper-based box such a cereal box or cardboard.)
- While recyclables do not need to be spotless, [it is recommended that items be rinsed](#) to keep the inside of your cart/bin and the collected materials clean. All containers MUST be empty.
- [Excess recyclables that cannot fit in your bin or cart](#) may be bundled up or put in a paper bag, cardboard box, or small open tote labeled for recycling and placed alongside the county-issued container at the curb.
- [Recyclables must be placed at the curb no later than 6 am of the day of collection.](#) Please place cart with the arrows on the lid facing the street, four feet from possible obstructions such as mailboxes or cars, and within 6 feet of the road.
- Your curbside collection and customer service contractor is Allied Waste Services. Questions and concerns, including requests for recycling carts, should be directed to them by calling 301-694-6498 or sending email to: frederickrecycles@republicservices.com

If your recyclables were not picked up, please report the missed collection to Allied Waste Services at 301-694-6498.

If you are unable to find the information or assistance you need, please call the Frederick County Office of Recycling at 301-600-2960 or send email to: recycle@FrederickCountyMD.gov

COLLECTION SCHEDULES. Curbside pick-up occurs every other week. Our free mobile app can provide your schedule, reminders and more: www.my-waste.mobi/FrederickMD (see pg.9 for more info.) A pdf copy of the yearly recycling schedule can be viewed or printed by visiting: www.FrederickCountyMD.gov/AtaGlance — Simply select the button for “Info at a Glance”, agree to the terms, then enter your street address in the search bar at the top of the page.

HOLIDAYS. Curbside collection does NOT take place on certain holidays, but rather will slide to the next day. This results in all collections that follow the holiday in that week to be picked up one day later than usual. “Slide weeks” happen around the following six holidays every year:

- New Year’s Day
- Memorial Day
- Independence Day
- Labor Day
- Thanksgiving
- Christmas

For example: If the regular recycling day would be Monday, May 26... that’s Memorial Day; recyclables will be picked up on Tuesday, May 27, instead. To accommodate this, all recycling pick-ups for that week will slide one day later, with the last pick up on Saturday instead of Friday.

WEATHER. Weather-related cancellations of curbside service are based on county road conditions and the storm forecast. Safety is our priority. Cancellations, delays or changes to service will be listed on our website (www.FrederickCountyMD.gov/recycle), updated in our mobile app (www.my-waste.mobi/FrederickMD), posted on our Facebook page (www.Facebook.com/FrederickRecycles), and announced in voice recordings on our phone line (301-600-2960) and sent to local media.

CARTS AND BINS. If you need a recycling cart, please contact Allied Waste Services (see contact info on previous page.) Every single-family household is entitled to one collection container free of charge; replacements for lost or damaged containers can be requested once per year. Wheeled carts come in three sizes: 35-, 65– and 95-gallon models. Traditional 18-gallon bins may be requested instead of a cart (not in addition to a cart.) For more detailed information on carts, see page 17.

Items Accepted for Single-Stream Recycling

Recyclable packaging (cans, jars, etc.) should always be emptied of all products before recycling.

- ✓ Magazines and catalogs, junk mail and envelopes
- ✓ Newspapers, including all inserts (PLEASE remove newspaper from any plastic delivery bags!)
- ✓ Brown paper bags
- ✓ Non-metallic wrapping paper and craft paper
- ✓ Paperboard boxes, such as cracker and cereal boxes *without liners*
- ✓ Thick paper, such as cardstock, file folders, etc.
- ✓ Corrugated cardboard (Remove any Styrofoam packing materials and outer plastic shrink-wrapping from cardboard packaging!)
- ✓ Books, including paperbacks, hardbacks and telephone books
- ✓ Clean paper products—colored and white, such as typing, fax, copy, letterhead, notebooks, etc.
- ✓ Shredded paper (please gather and place inside a paper bag)
- ✓ Milk cartons (paper or plastic) and juice boxes (not juice pouches)
- ✓ Glass food and beverage containers such as jars and bottles
- ✓ Tin and steel food and beverage containers, such as for pet food, soup and vegetable cans
- ✓ Aluminum food and beverage containers
- ✓ Clean aluminum foil and aluminum pie pans
- ✓ Empty aerosol cans
- ✓ Plastic bags, such as grocery bags, newspaper bags and others. These should ALWAYS be gathered and placed all together inside one bag)
- ✓ Empty, household, plastic containers and lids, including narrow-neck bottles (such as for water, soda bottles, detergent, salad dressing, etc.) and wide-mouth containers (such as peanut butter jars, margarine tubs, yogurt containers, kitty litter buckets, prescription bottles, etc.)

PLEASE NOTE—other items *are* recyclable, but not necessarily in the *single-stream* program. Please refer to pages 21-22 to learn how to recycle oversized plastics, electronics, appliances, textiles and more.

Items NOT Accepted for Recycling

When in doubt, throw it out! Non-recyclable trash hurts the recycling program by decreasing collection efficiency and reducing the market value of your recyclable items. Items that are not recyclable in Frederick County include:

- ✗ Soiled paper products (such as paper plates, greasy pizza boxes, etc..)
- ✗ Soft, low-grade paper products (such as napkins)—even if clean.
- ✗ Potato chip/snack food bags and cracker/cereal box liners
- ✗ Metallic, glittery or plastic wrapping paper or cards
- ✗ Waxed paper or waxed boxes, ice cream cartons
- ✗ Ceramic/pottery/china plates, mugs, etc.
- ✗ Drinking glasses, window glass, mirrors
- ✗ PVC pipes, vinyl siding, rubber hoses
- ✗ *Anything* made of Polystyrene (Styrofoam®)
- ✗ Microwaveable plastics (such as disposable meal trays)
- ✗ Trash bags (and please do not place recyclables inside trash bags!)
- ✗ Thin, brittle plastic containers and packaging (such as Solo cups or take-out/salad bars containers) and molded plastic retail packaging
- ✗ Hazardous material containers (such as for pesticides, motor oil, etc.)
- ✗ Metal objects that are not packaging/food containers (i.e., cans are OK, but pots, forks, wire hangers, etc.. are not accepted curbside. See p. 21 for scrap metal recycling at our drop off site.)

Four Basic Rules for PLASTIC... There are many types of plastic used in manufacturing—many of which are recyclable, but not all. Some plastics do not recycle well and others have little or no market for resale. *Refer to the plastics chart on pages 19-20 for more information.*

1. **No “mystery” plastics.** In general, plastics without a recycling ID code imprinted on them are NOT recyclable (This includes items such as plastic hangers, CD cases, plastic toys, trash bags, etc.)
2. No microwavable plastics; they are treated to be heat-resistant and **therefore don’t melt well or mix with other materials.**
3. No Styrofoam® (expanded polystyrene) products of any kind—even if the item has a recycling symbol on it (as coffee cups often do).
4. No thin, brittle plastics, **such as disposable party cups or “clamshell”** deli takeout containers. There is no market for these materials.

Ten Tips for Recycling Right!

Please DO NOT:

1. Put non-recyclable materials into your collection container. *When in doubt, throw it out!*
2. Place recyclable materials inside plastic bags. *The only exceptions to this rule are shredded paper, which should be placed inside a paper bag or cardboard box, and recyclable plastic bags, which should be gathered together inside a single recyclable plastic bag.*
3. Leave Styrofoam® packing materials inside a cardboard box or other container.
4. Leave foods or liquids inside of containers. *All containers should be emptied; rinsing is optional.*
5. Recycle microwaveable plastics. *This includes frozen dinner trays, take-out meal containers and items marked "microwave safe".*
6. Recycle thin, brittle plastics. *This includes disposable (Solo-type) cups, "clamshell" deli/bakery/produce containers, regardless of what number or symbol is imprinted on them.*
7. Recycle used paper plates, greasy pizza boxes, waxed paper or any soiled paper products.
8. Recycle paper towels, tissues and other soft paper products.
9. Set your cart more than six feet from the street or within four feet of potential obstructions (such as mailboxes).
10. Pack items down into collection containers.

Bag Basics:

- Garbage bags are not recyclable!
- Recyclable bags (like grocery bags) that are tossed single/loosely into a recycling cart can wrap around sorting facility machinery and are likely to be discarded as waste. *Please bundle bags together!*

Why NOT:

1. It makes the recycling program less efficient and reduces the value of the materials being sold for recycling.
2. Unlike garbage, recyclable materials must be sorted. *This means that if items were placed in a bag someone at the sorting facility would have to manually open every bag—something that simply isn't feasible given the quantity of material collected from across the county.*
3. **NO “styrofoam” of any kind is accepted for recycling in Frederick County—even if it is marked with a recycling symbol!**
4. Food and liquids contaminate clean recyclables, increase the **program's expense and decrease its efficiency and success.**
5. Microwaveable plastics are treated to be highly heat-resistant. *This makes them difficult to melt and recombine with other plastics.*
6. **They just don't recycle well in our system.** *These materials break apart during the collection/sorting processes and have little value in the recycling marketplace (i.e. manufacturers don't want them).*
7. Unlike other materials, paper is absorbent. *Once oil gets on paper, it binds to the fibers and cannot be separated/cleaned.*
8. **The fibers that make these papers soft are already “worn out” .**
9. Proper cart placement makes collecting recyclables from more than 75,000 homes a more efficient and safer process.
10. This can make containers difficult to empty or cause part of the contents to remain lodged in the cart. *Excess materials can be set next to a bin or cart inside open containers such as boxes or paper bags. Or, a larger sized cart may be ordered for no charge by visiting www.LearnMoreRecycleBetter.org or calling 301-694-6498.*

*The process of collecting, transporting, sorting and disposing of non-recyclable waste **makes Frederick County's recycling program less efficient and more expensive.** Remember...*

When in doubt, throw it out!

Put It In The Blue!

RECYCLING CARTS. There are THREE different sizes of wheeled recycling carts in Frederick County. Most households have 65-gallon carts. To see what size you have, check the identification number printed on the **front of the cart**. **The first two numbers indicate the cart's size:** 35-, 65- or 95-gallon capacity. There is no fee to exchange for a different size cart!

Cart ID codes circled below -
the first two numbers show the size of the cart:
35, 65 or 95 gallons!

If you live in a single-family home/townhome and do not have a cart
OR wish to change the size of your current cart, simply visit:

www.LearnMoreRecycleBetter.org

Or, call Allied Waste Services at 301-694-6498.

Cart Leases. One cart is issued per household for no charge. In addition to up-sizing, households that generate a large amount of recyclable materials may wish to lease an additional cart or carts for a *one-time, fully-refundable fee*. To find out more about the lease program, please send email to recycle@FrederickCountyMD.gov or call 301-600-2960.

Still Have Too Much Stuff? If you have excess recyclable materials, you may place them at the curb next to the cart, inside a cardboard box, paper bag or open container (similar in size to an 18-gallon recycling bin) that has been clearly labeled for recycling. You may also utilize the recycling drop off center at the DSWM facilities, located at 9031 Reichs Ford Road in Frederick. (see p. 21 for more info.)

Who Owns the Cart? Carts are the property of Frederick County Government and are assigned to specific addresses, not to the individuals who live there. If you move, your cart stays behind. Please do not make **alterations to carts or make permanent marking on them**. If you'd like to identify the cart assigned to your house, we suggest marking it with weatherproof duct or electrical tape.

Educational Resources

DID YOU KNOW the Department of Solid Waste Management Staff provides educational programs for groups? We also give tours of the facilities at Reichs Ford Road. If you want to learn more about what we do and ways you can help reduce waste, give us a call at 301-600-2960.

Our programs—given at your site or ours—include:

- From Curb to Market, How Recycling Works
- Home Composting: The Basics and Beyond
- Waste Reduction in Frederick County: Think Beyond the Bin!
- Hands-On Recycling: Papermaking in Process
- Recycling Works! Businesses Going Green

We can also provide displays, handouts and staff presence at your local event to promote sustainability topics in Frederick County! You can visit our website to download the *'Request for Outreach Services'* form, or call us for more info. Requests can also be sent by email to: recycle@FrederickCountyMD.gov

Subscribe to our e-newsletter! The Office of Recycling sends out a free e-newsletter, emailed just four times a year. This short bulletin is full of facts and tips, program updates, event calendars and more! Visit www.FrederickCountyMD.gov/recycle to view newsletters or subscribe!

ONLINE SOURCES OF RECYCLING INFORMATION

- www.Facebook.com/FrederickRecycles Find us on Facebook! To stay up-to-date on the recycling program (including changes to the curbside collection schedule), find out about contests and events or ask a question, visit our community page.
- www.epa.gov/waste An immense amount of information on waste reduction for businesses, citizens, teachers and students **is available on the Environmental Protection Agency's website.**
- www.naturebridge.org/garbology A fun, interactive website designed to get students and families thinking and learning about waste, recycling and composting.

Type of Plastic	Examples of What is Accepted for Curbside Recycling
 <p>PET polyethylene terephthalate</p> <p><i>It's tough and shatterproof.</i></p>	<p>Peanut butter jars.</p> <p>Narrow-neck containers, such as for detergents, mouth wash, salad dressing, vitamins, soda and water bottles.</p>
 <p>HDPE high density polyethylene</p> <p><i>It can be both flexible and durable.</i></p>	<p>Milk and water jugs, juice bottles, dairy tubs such as whipped topping or sour cream, liquid detergent bottles, medicine bottles, kitty litter jugs, plastic grocery bags.</p>
 <p>PVC polyvinyl chloride</p> <p><i>It's tough and chemical resistant.</i></p>	<p>Bottles for shampoo, cooking oil, salad dressing.</p>
 <p>LDPE low density polyethylene</p> <p><i>It's flexible and tough.</i></p>	<p>Food storage containers, dairy container lids, bags newspapers are delivered in, dry cleaning bags.</p>
 <p>PP polypropylene</p> <p><i>It's stiff, chemical and heat resistant.</i></p>	<p>Medicine bottles, yogurt containers, margarine tubs, rigid/reusable plastic cups, nursery plant packs and plastic flower pots.</p>
 <p>PS polystyrene</p> <p><i>It's brittle and see-through.</i></p>	<p>Dairy containers, medicine and vitamin bottles, flower pots and nursery packs.</p>
 <p>OTHER other plastics</p>	<p>Bottles such as for ketchup, syrup, window cleaner, 5-gallon water coolers.</p>

Items NOT Recyclable in the Curbside Program	It Gets Made Into...
Thin brittle plastics and “clamshell” packaging—often used to hold items such as strawberries, baked goods such as muffins, or salad bar meal containers.	Bottles, carpeting, tennis balls, insulation for jackets, t-shirts, paint brushes.
Materials made from Tyvek, such as envelopes and protective gear. Objects too large to fit in a recycling cart (some of these items can be brought to the Bulky Rigid Plastics recycling dumpster at the DSWM facilities, 9031 Reichs Ford Rd.)	Plastic lumber, detergent and bleach bottles, trash cans, buckets, toys, traffic barriers, fly swatters.
Rigid and bulky PVC, such as plumbing pipes.	Floor mats, mud flaps, pipes, hoses, computer and electric cord wraps.
Bags without a plastic identification number printed on them, such as sandwich bags and some bread bags.	Garbage can liners, frisbees, plastic lumber, lawn furniture, toys.
Thin, brittle #5 plastics, such as disposable drinking cups and take-out food containers. Polypropylene fabrics.	Brooms, lawn mower wheels, ice scrapers, paint buckets, toothbrushes. Spun fiber fabrics and filling for coats, sleeping bags and blankets.
Clear, brittle containers and cups. Disposable foam beverage cups or plates, carry-out containers, foam egg cartons, packing peanuts, <i>anything</i> “Styrofoam”.	Building insulation, flower pots, CD cases and sleeves, rulers, trash cans, food service trays.
Items marked “compostable” or “biodegradable”. Objects too large to fit in a recycling cart, and in general, objects without an identification code imprinted on them.	Street signs, pens, concrete supports, ice scrapers.

Recycling Other Materials

The Recycling Drop Off Center at 9031 Reichs Ford Road accepts much more than just bottles, cans, boxes and jars! [By entering the facilities at the Recycle Road entrance](#) (see map on page 26), you may bring in (Monday through Saturday, 7am-4:30pm), for no fee, any of the materials accepted for curbside recycling as well as:

- **Bulky/Oversized Rigid Plastics:** Items such as: lawn furniture, large plastic toys (such as outdoor play sets), coolers, kiddie pools, plastic buckets and storage totes, plastic shelving, laundry baskets, broken trash cans, etc. Even large rigid automotive plastics such as car bumpers! Youth/infant car seats are accepted if the straps, padding and fabric have been removed. (*Not Accepted:* Items with motors and electronic components, PVC items (including pipes), vinyl siding, non-rigid materials such as vinyl and rubber (such as garden hoses, landscape edging, tarps) or any other soft, flexible plastics.)
- **Flexible Foam:** Foam carpet padding, foam couch cushions, foam-only mattresses. (*Not Accepted:* **Jute/fiber carpet padding, Styrofoam™**)
- **Appliances:** “White goods” such as refrigerators, stoves, washing machines, air conditioners, hot water heaters, etc. (*Not Accepted:* small, non metal-body appliances such as blenders, alarm clocks, etc.)
- **Scrap Metal:** Most any item that is made of at least 75% metal, such as metal shelving, filing cabinets, bicycles, fencing, lawn mowers, wire hangers, grills, swing sets, aluminum lawn chairs, etc.
- **Automotive Materials:** Motor oil and filters, antifreeze, lead-acid batteries and large rigid, plastic car parts (such as bumpers). (*Not Accepted:* any other automotive components; tires—see next page.)
- **Yard Waste:** Small amounts (materials that fit inside a vehicle or bed of a standard truck, not trailer or larger loads) of yard waste can be dropped off in the convenience dumpster labeled for these materials at the recycling drop off site. The primary yard waste recycling area must be accessed by entering through the main gate (see page 23).

Please Note: Textiles and clothing are not accepted for recycling by the Department of Solid Waste Management, but other programs and drop off sites exist locally; see pages 5-6 for information on Goodwill and The Frederick Rescue Mission. Goodwill even accepts clothing no longer in wearable condition, for true textile recycling!

Recycling at the Main DSWM Facilities

The main facility entrance is used when bringing in these recyclable materials:

- **Yard Waste:** A dumpster is available for dropping off small amounts of yard waste at the Recycling Drop Off Center, but the primary yard waste recycling site is located on the DSWM main grounds, accessed via the main site entrance. *See next page for more information on yard waste.*
- **Tires:** Tires are brought through the main entrance and charged at the standard MSW drop off rates. Residents may bring up to five tires per year to the DSWM facilities. *(For more information & rates, see page 34).*
- **Electronics:** These should be brought through the main entrance to access the **e-cycling drop off in the Citizen's Convenience Center**. Desktop, laptop and tablet computers and all accessories, cables, cords and components. *(We cannot provide a certificate of destruction for data/hard drives.)* Copiers, scanners, printers, fax machines, GPS units, cell phones, digital cameras, iPods, DVD players, VCRs, stereo equipment, televisions. There is a fee of \$0.76 per 20 pounds of electronics being recycled.

Commercial Recyclables. Businesses in Frederick County can—and do—recycle! This includes multi-family housing units, which have the same business recycling options as any other commercial entity in the county. Businesses/organizations may bring their own materials or hire a hauler to collect and transport recyclables to our facilities. Commercial recyclables are processed at a rate of \$25 per ton, a big savings over commercial waste disposal fees. Many local businesses **have found that “going green” has actually saved “green” as well!**

Businesses may recycle all of the same materials that residents do in the single-stream programs (see p. 13). DSWM can offer assistance in planning, starting or expanding a commercial recycling program by:

- advising on how to conduct waste audits
- providing resources for contracting a hauler
- helping network with other recycling businesses
- leading staff trainings or providing outreach materials
- providing files for flyers, display materials and more.

Or, call 301-600-2890 or send email to recycle@FrederickCountyMD.gov

Yard Waste Recycling

COUNTY ORDINANCE 06~03~399. Since 2006 yard waste has been banned from the landfill. This includes materials generated by residents and commercial enterprises in the maintenance of lawns, gardens and landscaped areas.

Residents have two main options for handling yard waste:

1. Compost at home (more info on page 26).
2. Bring or have the materials delivered to the DSWM mulch and composting facilities (addresses listed below).

PLEASE NOTE: Residents of municipalities and those living in homeowner association-controlled areas may have curbside yard waste collection provided for them by these entities. Please contact your town office or HOA for more information (*town contact info listed on page 37.*)

DEPARTMENT OF SOLID WASTE MANAGEMENT (DSWM) COMPOSTING FACILITIES. In 2008 a new facility was constructed for the processing of yard waste. It is located within our main site, at 9031 Reichs Ford Road in Frederick.

Top-notch operational practices have been implemented at this site, including the use of specialized composting equipment, continual product monitoring, and the adoption of quality control standards. **Frederick County's composting program won a national award in 2009—but the real reward is the high quality finished product—a premium soil amendment available for sale (*see next page.*)**

MATERIALS ACCEPTED FOR YARD WASTE RECYCLING include leaves, grass clippings, plants, shrubs, prunings and trimmings (no greater than eight feet in length and six inches in diameter.)

NOT ACCEPTED: *Food crops (fruits or vegetables), stumps, limbs larger than 8' long or 6" in diameter and plastic bags (materials may be placed in paper bags).*

CUT CHRISTMAS TREES are accepted for recycling after the Christmas holiday and through January at several locations throughout the County. Our website lists all temporary drop off locations every December—January.

HERITAGE FARM PARK DROP OFF. An additional yard waste drop off site is available year round at 9224 Devilbiss Bridge Road in Walkersville . Please note that this is not a staffed site and the free mulch product produced there is not screened or monitored.

Frederick County's Premium Compost

COMPOST AND MULCH FOR SALE. The compost and mulch produced at the 9031 Reichs Ford Road facilities is sold in bulk from the same site (no pre-bagged materials or deliveries are available.) Our compost is named *Revive* for its ability to transform old materials into a new product and also for the affect it can have on your landscape!

Revive compost and our double-ground mulch costs \$15 per ton. For our staff to load the materials, customers should have an open-bed vehicle or trailer and bring a tarp to cover their load. If smaller amounts are desired, residents may bring a tub or bag and a shovel to hand load their own materials . The site is accessible during regular operating hours, Monday—Saturday, 7 am until 4:30 pm. It is recommended to call 301-600-2955 first for product availability, before driving out to purchase.

Revive compost is a lab-tested and field-proven product that provides excellent results by:

- Slowly releasing essential soil nutrients
- Increasing the ability of sandy soils to retain water and improving drainage in clay soils
- Stimulating root growth by increasing aeration and loosening heavy and compacted soils
- Decreasing runoff and soil erosion
- Improving and stabilizing soil pH

Compost can be used many ways in the landscape:

- To establish a new lawn or to top-dress an existing lawn
- To get a new flower or vegetable garden off to a great start
- To boost the health of established gardens
- To mend small bare spots in turf
- To plant ornamental trees and shrubs
- To make a premium potting soil for container gardening
- To build raised-bed gardens
- To make plantings more resistant to drought, pests and diseases

To see more information about our compost—including lab test results—please visit: www.FrederickCountyMD.gov/Revive

*The secret to
a truly “green” thumb?*
Reduce, Reuse, Recycle
...and use **COMPOST** *too!*

Each Year,
the Frederick County Department of
Solid Waste Management's
award-winning program

transforms more than

16 million pounds

*of mixed yard waste and woody materials
into superior quality*

Revive TM compost for sale.

The County composting facility is
located at 9031 Reichs Ford Road
in Frederick. The site may be accessed
Monday - Saturday, 7am - 4:30pm.
Compost is:

- **\$15 per ton**
- **Sold in bulk, not bagged**
- **Loaded for you at our site into open trailers or trucks**

(cover/tarp required for transport)

Revive compost improves things from the ground up!

For lab results and use tips, visit www.FrederickCountyMD.gov/compost or call 301-600-1848

Home Composting and Grasscycling

The Department of Solid Waste Management sells home composting bins for \$20 each (payable by check only); available at our Reichs Ford Road Administrative Office.

COMPOSTING is a method of assisting the natural decomposition process to produce a rich soil amendment that is great for gardens and lawns. By composting you can recycle not only your yard waste, but also many of your kitchen scraps and some household waste as well.

The basic ingredients for a compost pile are:

1. **Feed stocks:** Grass, leaves, kitchen scraps, shredded paper, etc.
2. **A structure:** A fancy bin isn't necessary, but it can make the process more attractive.
3. **Moisture:** The pile needs enough to stay damp but not wet.
4. **Heat:** Generated naturally during the process, is lost during winter.
5. **Air:** The compost pile is alive with beneficial microorganisms that need oxygen to do their work. Turning a pile lets air in—and also solves many common problems, from odors to excess moisture.
6. **Time:** Depends on many variables—especially how often the pile is turned—but in general it takes anywhere from 4 weeks to 18 months.

GRASSCYCLING is the all-natural method that contributes to the health of your lawn *and* the local environment. Grasscycling is the simple process of leaving grass clippings on the lawn rather than raking or bagging them.

It's easy and has real advantages, including:

- Lawn maintenance takes less time.
- Adds vital organic matter and fertility to your soil—providing about 25% of the nitrogen your lawn needs for the year!
- Eliminates the expense of disposing bagged clippings.

Lawns that use grasscycling:

- Tend to be more drought resistant
- Need less fertilizer
- Contribute to a healthy local environment

FOR MORE INFORMATION visit our website:
www.FrederickCountyMD.gov/recycle

The Department of Solid Waste Management

There is only one public landfill in Frederick County. The Department of Solid Waste Management (DSWM) manages that operation as well as the other facilities that share the site at 9031 Reichs Ford Road (see map on page 31). The landfill was started in 1969; the current site encompasses 520 acres and is used to process or dispose of commercial, residential and industrial waste.

The original landfill (Site A) filled to capacity and was closed in 1998. A second, adjacent landfill (Site B) opened in 1997 and has remained in use **since. To preserve space, almost all of Frederick County's waste is trucked** out of state for disposal at other landfill sites. This is projected to keep Site B open until the year 2045.

In addition to the active landfill, the facilities at this site include: filled and closed landfill sections, composting operations, a materials transfer station, a landfill gas-to-**energy project, Citizens' Convenience Center, a** recycling drop off center, administrative offices, and other related operations.

Adult tours of the Department of Solid Waste facilities can be arranged (for groups of at least 6 people) by calling 301-600-7405 or sending email to: landfill@frederickcountymd.gov

Aerial view of the transfer station, and mulch and compost production area

Funding for Operations. The landfill and related facilities are funded in part through users fees and a **System Benefit Charge (SBC)**, ensuring that no general tax dollars are spent on waste management or recycling.

The SBC is an annual charge included on the County's taxes and fees bill. Residential rates are applied per dwelling unit for both single family and multi-family properties. Non-residential rates are applied to properties based on improvement values and the number of billing units.

Location, Entrance Information and Hours

The Department of Solid Waste Management facilities are located at 9031 Reichs Ford Road in Frederick. *There are two entrances to the facilities (please refer to the map on page 31):*

- **RECYCLE ROAD.** Identified by a green street marking sign, Recycle Road provides access to the recycling drop-off center and Home Composting Demonstration Area.
- **SCALE HOUSE.** The main entrance to our site is marked by a large sign identifying the Department of Solid Waste **Management and provides access to the Citizen's Convenience Center**, landfill, transfer station, yard waste recycling, administrative offices and other facilities. When arriving at the main entrance, your first stop will be at the scale house. In order to keep accurate records of the tons of waste disposed, all vehicles are weighed as they enter and exit. The staff person who greets you will ask what you are disposing, inquire whether you have cash or check to pay, and then direct you to your next stop.

SITE ACCESS HOURS: Monday—Saturday, 7 am - 4:30 pm

OFFICE HOURS: Monday—Friday, 7:30 am - 4:30 pm

HOLIDAYS: All facilities at the Reichs Ford Road site are closed for the following holidays each year: New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

WEATHER-RELATED CLOSINGS: For information during inclement weather call 301-600-1848; a recording that contains current information on any weather-related closings will be posted. Or, visit our website at www.FrederickCountyMD.gov/landfill

DIRECTIONS:

From points north: Take Interstate 70 East towards Baltimore. Take Exit 55- South Street. At the bottom of the ramp, turn left onto Reich's Ford Road. Proceed 3.5 miles, the facilities will be on your right.

From points south: Take 270 North to exit 32, Interstate 70 East towards Frederick. Take Exit 55- South Street and turn left at the bottom of the ramp. Proceed 3.5 miles, the facilities will be on your right.

Residential Disposal Rates and Payments

The DSWM facilities are to be used for processing waste and recyclables generated in Frederick County only. On your first visit proof of residency is required, such as a driver's license, vehicle registration or utility bill. Once residency is established, customers are provided with a landfill identification card or sticker .

DISPOSAL RATES FOR RESIDENTS can vary based on the fuel index. *Call or check our website to see if fees have been adjusted since this printing.*

Municipal Solid Waste (general household trash), Tires:

- ▶ Cash/Check — \$0.69 per 20 pounds (\$69 per ton)

Construction & Demolition debris (rubble):

- ▶ Cash/Check — \$0.78 per 20 pounds (\$78 per ton)

Mattresses and Box Springs — Residents may dispose up to 3 mattresses and 3 box springs per year at standard Municipal Solid Waste rates (see above). More than 6 total units will be charged at the *commercial* rate of \$28.00 per piece.

Electronics Recycling — Electronics must be brought to the facility via the main entrance, where they will be charged at the rate of \$0.76 per 20 pounds (\$76 per ton) for recycling.

Yard Trimmings and Single-Stream Recyclables — There is no residential/household charge to drop off these materials.

ALL TRANSACTIONS MUST BE PAID FOR BEFORE OR AT THE TIME MATERIALS ARE DROPPED OFF.

Acceptable forms of payment are cash, personal/**business checks, money order or cashier's check.** All checks and money orders should be made payable to the *Treasurer of Frederick County.* Credit /debit cards are not accepted at this time.

PRE-PAYMENT. Facility users may choose to open a prepaid account to pay for their tipping fees. Prepaid accounts are set up at the scale house.

www.FrederickCountyMD.gov/WasteManagement

Facility and Local Regulations

COVERED LOADS. Since 1989 Maryland law has required that "A vehicle with any load may not be driven on any highway unless the load and any covering on the load are fastened securely to prevent the load or covering from becoming loose or detached or in any way endangering other users of the highway." (*See Maryland Transportation Article 24-106.1*)

This means that all loads coming into or leaving the DSWM facilities must be covered or otherwise secure and not in danger of blowing or spilling from the vehicle. This includes waste, recyclables or yard debris coming into our facilities as well as mulch or compost being hauled away!

PROHIBITED ACTIVITIES. It is unlawful to do any of the following on the premises of the Department of Solid Waste Management:

- Salvaging or removal of waste or recyclable items
- Dumping before or after regular operating hours
- Dumping hot ashes, firearms or explosives
- Reckless, speeding or unsafe operation of a vehicle.

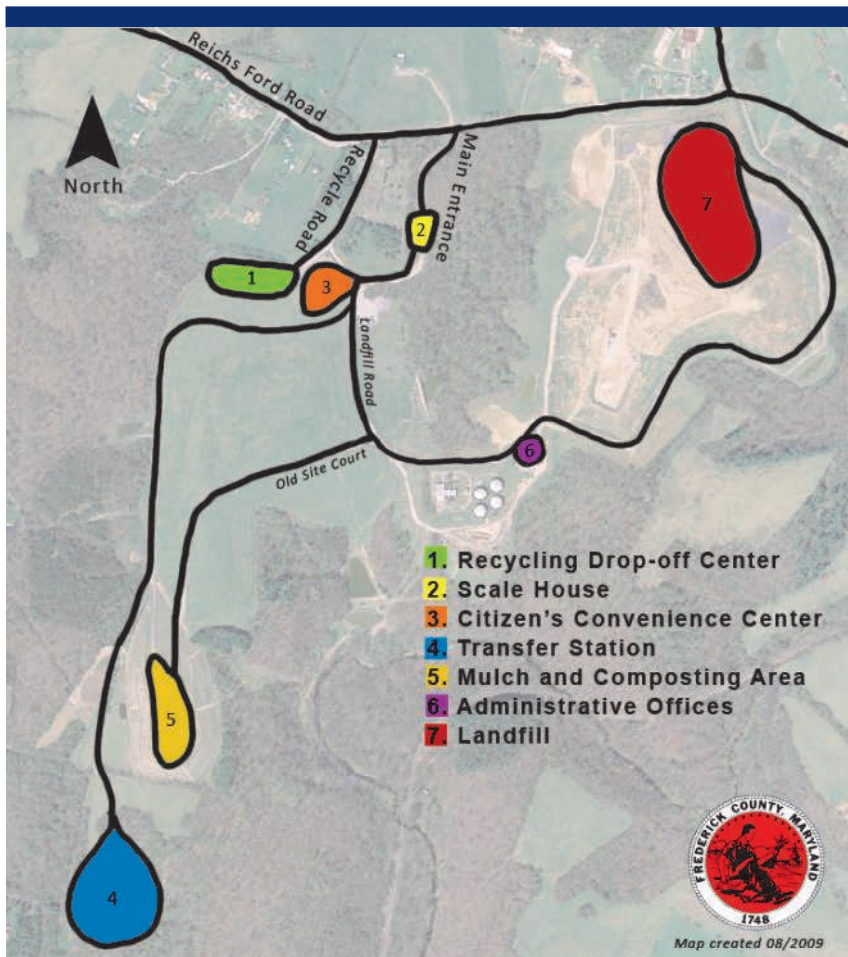

CHILDREN UNDER THE AGE OF 16 must remain in vehicle at all times while on the premises.

RADIATION CHECKS. Site visitors should be advised that all incoming vehicles are scanned for radioactive materials. Individuals who have recently been exposed to certain medical radiation may **trigger the facility's radiation alert and will need to comply with a brief vehicle inspection.**

HAZARDOUS WASTE. Any person depositing hazardous waste in a refuse disposal area is subject to a civil penalty not to exceed \$10,000 and a mandatory injunction by the Board of County Commissioners to cause the violator to remove the hazardous material at their own expense. This may include site grading, pollution control, decontamination of equipment or personnel and the violator shall be liable for any injuries to personnel as a result of depositing hazardous waste. *For examples of hazardous materials and information on proper disposal, please see page 35.*

OTHER UNACCEPTABLE MATERIALS. Liquids of any kind (including paint, fuels or oils) are not accepted for disposal. Yard waste is banned from landfill disposal, but is accepted for recycling at the designated drop off site (see map on page 31).

Reichs Ford Road Facilities Map

Use the Recycle Road Entrance for:

- Depositing single stream recyclables, bulky plastics, scrap metal, recyclable auto materials, appliances and small amounts of yard waste.
- Access to the Education Center and Home Composting Demonstration Area (located adjacent to the Recycling Drop Off Center).

Use the Main Entrance for:

- Depositing household waste (trash, mattresses, furniture, etc.), yard waste, electronics recycling and scrap tires.
- Purchasing mulch or compost.
- Administrative/office business.

1. **The Recycling Drop-Off Center** is where most household recyclables, including bulky plastics, scrap metal, appliances, antifreeze, car batteries and motor oil can be deposited at no charge. The exceptions are electronics and tires, which are brought in through the main entrance and incur drop-off fees (*see rates on page 29.*)
2. **The Scale House** uses modern technology and experienced staff to record efficient and accurate transactions. All vehicles entering and leaving the facilities via the main entrance are weighed; this allows for gathering data on the various types of wastes and recyclables processed through the facility as well as assessing any applicable drop-off fees. Transactions may be paid for with cash, check or prepaid accounts only.
3. **The Citizens' Convenience Center** is the primary area designated for efficient disposal of general household wastes and is also where electronics are collected for recycling (a drop off fee of \$0.76 per 20 pounds of material applies to e-cycling). Staff oversee this area but residents should be capable of unloading their own materials. Please be safe and aware of people and vehicles in this area.
4. **The Transfer Station** processes both waste and recyclables, as they are unloaded from collection vehicles and transferred into tractor-trailers for transport to out-of-county facilities for disposal or processing. Please note that the floor of this facility is slippery and heavy equipment is in use. Stay within 3 feet of your vehicle and exercise caution.
5. **The Yard Waste Recycling Site** is staffed from 7am until 4:30pm (no closings for lunch). This is where yard waste is converted into valuable landscape products. Residents must be able to unload their own vehicles when dropping off yard waste. Those wishing to purchase mulch or compost should have an open-bed vehicle or trailer and are required to bring a tarp or other covering to secure the load. Staff will load all bulk materials (materials are not available for sale in bags at this time).
6. **Administrative Offices** house the Department of Solid Waste Management administrative staff, including the Office of Recycling. This area also has compost bins for sale and recycling carts available.
7. **The Landfill** is used to process only a minority of the county's waste and is not generally open to residential traffic; tours may be arranged.

Scavenging materials is strictly prohibited anywhere on site.

Disposal of Specific Items

BULK TRASH AND FURNITURE are regularly disposed of at standard tipping fee rates (see page 29). Residents are responsible for transporting their bulk items to the Reichs Ford Road Sanitary Landfill.

** If you live within an incorporated municipality or subdivision, contact your town office or **homeowner's association regarding possible bulk item curbside collections in your area.***

→ Municipal contacts are listed on page 37.

WHITE GOODS: Large appliances such as refrigerators, freezers, washers, air conditioners, etc., are accepted at the Reichs Ford Road Recycling Center year round at no charge. (See page 21 for more information.)

CONSTRUCTION & DEMOLITION DEBRIS, LAND CLEARING AND RUBBLE are disposed of at a higher rate than regular trash. This includes: asphalt, concrete, brick and cement, insulation, pipes and wires, plaster and drywall, flooring and tile, lumber, wallpaper, carpet, structural fabrics and steel. It also includes large woody materials, such as stumps and root mats. Any load containing a mixture of categories that includes any of these materials will be charged at the higher rate.

The current tipping fee for these materials is \$78 per ton/\$0.78 per 20 pounds, paid by check or cash. (These rates may be adjusted to reflect the fuel index.)

BATTERIES Standard alkaline batteries may be disposed of with regular household trash (mercury and other toxins were reduced or eliminated from the manufacturing process in the 1990's). Please avoid placing large groups of alkaline batteries together as residual charges contained in the batteries can pose a hazard when brought into contact with each other.

Rechargeable batteries should be taken to a recycling station (visit www.Call2Recycle.org to view lists of the many local sites) or brought to our Household Hazardous Waste Drop Off events (see p.35 for more info).

Lead-acid batteries, such as car batteries, can be dropped off for no charge at our Reichs Ford Road Recycling Center (see p. 21 for more info).

SCRAP TIRES have been banned from disposal in Maryland landfills since 1994. However, the Department of Solid Waste Management provides two scrap tire recycling trailers at its Reichs Ford Road location and, when state funding is available, hosts a free tire drop-off event once each year in May. You may call 301-600-1848 for more information.

SCRAP TIRE DISPOSAL POLICIES:

- **Residents may bring in up to five tires per calendar year.** Tires the size of 33" or less will be charged the prevailing tipping fee rate. Anyone bringing in more than five tires per year will need to provide a valid Scrap Tire Haulers License in order to legally dispose through our tire program and will be charged at the rate of \$160 per ton. (For more information about obtaining a Scrap Tire Haulers License contact the Maryland Department of the Environment by calling 800-633-6101, extension 3315.)
- **Scrap tires must be segregated from waste loads** to ensure that they are not disposed of in landfill facilities.
- **No construction/heavy equipment tires are accepted.**
- **Tires must be stacked in the designated tire collection trailers,** and cannot contain waste within them. Customers must vertically stack tires within the correct tire trailer (signs indicate where to place tires on rims or tires off rims). Tires cannot be dumped on the ground or thrown into the trailers unstacked.
- Due to space limitations, **advance notification must be obtained prior to delivering loads of ten or more tires.** Please call 301-600-2086 to make arrangements for your request.
- **Failure to abide by these rules** may result in rejection of all future loads of scrap tires from the customer/company in violation by the Department of Solid Waste Management.

Questions? Visit us online at:
www.FrederickCountyMD.gov/WasteManagement
or send email to landfill@FrederickCountyMD.gov

Household Hazardous Waste

Residents are asked to please dispose of their household hazardous waste in an environmentally sound manner. To assist with this, DSWM sponsors two Household Hazardous Waste Drop-Off events each year. There is no charge to participate, and the events are open to all Frederick County residents (*for household waste only, no businesses.*)

ITEMS ACCEPTED INCLUDE:

- fluorescent bulbs (compact & tube)
- medicines (in original containers)
- fuels (gasoline/kerosene)
- thinners and solvents
- rechargeable batteries
- pesticides/insecticides/fungicides
- household cleaners
- pool chemicals
- mercury thermometers
- photographic chemicals
- mothballs
- stains & sealants

ITEMS NOT ACCEPTED INCLUDE:

- alkaline or lead-acid batteries
- ammunition & explosives
- biohazard waste
- freon tanks & cylinders
- fuel tanks and cylinders
- fire extinguishers
- fireworks
- firearms
- medical sharps (needles, etc.)
- motor oil & filters
- paint
- tires
- electronics
- radioactive materials
- regular trash/recyclables

Two Household Hazardous Waste Drop-Off Days are held each year; one in spring and one each fall. To find out the date and location of the next event, please visit our website: www.FrederickCountyMD.gov/wastemanagement
Or, for more information or assistance call (301) 600-1848.

DID YOU KNOW that CFL light bulbs and rechargeable batteries can be recycled year-round at any Home Depot or Lowes Hardware store, or locally at The Common Market or **Mom's Organic Market?**

Proper Disposal of Items Not Accepted at Drop-Off Events:

- To dispose of **needles and medical “sharps”**, follow these three steps:
 1. Place all sharps in a disposable, puncture-resistant container with a small opening—a laundry detergent or bleach bottle works well.
 2. When 3/4 full of sharps, add a solution of 1 part bleach and 3 parts water to the container, shake to mix, and then drain out the liquid.
 3. **Tighten lid and tape securely closed, write “SHARPS” on the container** and then dispose in regular trash.
- **Ammunition & guns**—Contact the MD State Police at 301-600-4151.
- If disposing of explosives, **Contact the State Fire Marshall Bomb Squad** by calling 410-859-7152.
- **Fireworks & Flares**—Call the Frederick County Fire Marshall: 301-600-1479.
- **Fire extinguishers**— Contact Bakers Fire Protection Service: 301-810-5016.
- To dispose of **paint (oil-based or latex)**, remove the lid and add mulch, shredded paper, kitty litter or store-bought drying agents to speed the drying process. Once paint is completely dried out, it can be disposed of with regular household trash.
- **Vehicle batteries, motor oil/filters and antifreeze** are not accepted at this event since these items may be recycled all year for no cost at the Recycling Center at 9031 Reichs Ford Road (*more info on page 21*).
- Standard, non-rechargeable **alkaline batteries** (such as D, AA, etc.) may be disposed in your regular residential trash.
- **Fuel canisters, such as for camping stoves**— Contact Aero Energy (301) 662-4101 or the manufacturer for options, or better yet, purchase a stove with a refillable canister!
- **Propane tanks** need to be returned to a vendor for proper disposal. The following vendors may be able to assist with tank disposal: Aero Energy (301) 662-4101 or AmeriGas (301) 620-9046. You can also check for vendors listed in the Yellow Pages under Gas-Propane.
- **Empty Helium Tanks** may be deposited for no charge in our scrap metal drop off bin (see p. 21) Any residual helium left in the tank must first be released by opening the valve. After the tank has been depressurized in this way, unscrew the nozzle on the tank and remove it completely.

Municipal Services and Waste Haulers

Not all services related to waste are provided by the Frederick County Department of Solid Waste Management. While the County is the only residential service provider for recycling, many **municipalities and homeowner's associations handle trash-related services** for their communities; this is a partial list of such entities.

YEARLY EVENTS/DATES FOR RESIDENTS TO REMEMBER:

Please check our website or call to find out specific dates and locations for the following yearly events:

January—Landfill and offices closed on New Years Day
Christmas Tree Recycling Drop-Off sites are open for one month

April—4/22 is Earth Day, check our website for special events

May—Landfill and offices are closed on Memorial Day
Household Hazardous Waste Drop-Off event; check online for date

July—Landfill and offices are closed on Independence Day

September—Landfill and offices are closed on Labor Day

October—Household Hazardous Waste Drop-Off event; call for exact date

November—11/15 America Recycles! Day, check online for special events
Landfill and offices are closed on Thanksgiving Day

December—Landfill and offices are closed on Christmas Day
